

# LEATHER CARE

CLEANING KIT

NATUZZI

## Ink Remover

For topcoated leathers (finished leathers) not for nubuck and aniline (unfinished leathers).

**Description:** INK REMOVER is a water-based product specifically made to remove **recent ink marks or lipstick stains from topcoated leathers (not for nubuck and aniline)**. Removal becomes increasingly more difficult with time.

**Pre-test:** Prior to use, dampen a soft white cloth with water. Lightly rub the leather on a hidden area to see if the leather is colourfast. If colour has been removed, do not use the stick. Otherwise, apply some product on a hidden area and try to clean with a soft white cloth.

**If you see colour transferred to the cloth discontinue use.**

**Use:** Try to remove stains as soon as possible. Rub the product directly over the spot, allowing 30 seconds for the ink or lipstick to dissolve. Once the stain starts to dissolve, use a soft white cloth to wipe away both the INK REMOVER and stain.

For stubborn stains, a further application may be needed. Proceed with an application of Leather Cleaner on the sponge to remove all residues and then protect the leather with Leather Protector using the cloth provided.

For a correct use of the INK REMOVER, **never rub the leather aggressively. If the stain is not removed with INK REMOVER we suggest to discontinue use.**

In order to avoid irreversible damage to the sofa we suggest you to consult the retailer or the number [UK] +44 1235 444754 - [www.valsparuk.com](http://www.valsparuk.com) - [AUS] +61 2 84845200 or send an email to [info@lillyindustries.com.au](mailto:info@lillyindustries.com.au).

**Attention:** Do not swallow. Keep away from children. Avoid contact with eyes. In case of contact flush with water. Wash hands after use.

# Leather Cleaner

For all types of leather except nubuck.

EN

**Description:** LEATHER CLEANER is a totally solvent-free cleaner designed to clean delicately and effectively without damaging the natural beauty and suppleness of leather.

LEATHER CLEANER has been formulated to minimise any residual traces left by the cleaning process. LEATHER CLEANER is much more effective if the leather has been previously protected with LEATHER PROTECTOR.

**Pre-test:** To obtain the best results shake well before use. LEATHER CLEANER must not be applied to nubuck. These leathers darken after application.

Before applying, test LEATHER CLEANER on a hidden area of leather using a soft white cloth and check whether or not it darkens when completely dry. Check that no dye has transferred to the cleaning cloth and that the leather does not fade. If the tested area darkens, leaves a stain or you are not satisfied with the results do not use.

**Use:** LEATHER CLEANER removes dirt, grease and water stains. Try to remove excess dirt as quickly as possible using non-abrasive paper towel, taking special care not to work the dirt further into the leather.

Shake the bottle vigorously and apply LEATHER CLEANER to the sponge. Squeeze repeatedly to assure sufficient absorption. Rub the sponge delicately over the stain with a circular movement, starting from the outer edges and working inwards, without applying too much pressure.

Soak up excess liquid by swabbing with a paper towel. It may be necessary to repeat this operation on very dirty areas.

Leave to air dry naturally. Natuzzi's prestige "Natural" leathers have been treated as little as possible to retain their natural splendour. This, however, means they are more delicate and stains may not be completely removed after application.

We strongly advise testing the product on a hidden area of leather before use. In case of doubts or if stains persist consult the retailer or contact the number [UK] +44 1235 444754 - [www.valsparuk.com](http://www.valsparuk.com) - [AUS] +61 2 84845200 or send an email to [info@lillyindustries.com.au](mailto:info@lillyindustries.com.au). Apply LEATHER PROTECTOR to dry leather using the white cloth provided to maintain its natural suppleness over time and improve protection against the build up of dirt.

**Attention:** Do not swallow. Keep away from children. Avoid contact with eyes. In case of contact flush with water. Wash hands after use.

# Leather Protector

For all types of leather except nubuck.

**Description:** LEATHER PROTECTOR is a remarkably advanced product that can protect leather from water, oil, alcohol and grease based stains. Application of LEATHER PROTECTOR makes it easier to eliminate stains that would otherwise be difficult to remove. LEATHER PROTECTOR creates an invisible barrier that improves resistance to dirt and facilitates cleaning.

**Pre-test:** To obtain the best results shake well before use.

LEATHER PROTECTOR must not be applied to nubuck, which will darken after application. Before applying, test LEATHER PROTECTOR on a hidden area of leather using a soft white cloth and check whether or not it darkens when completely dry. Check that no dye transfers to the cleaning cloth and that the leather does not fade. If the tested area darkens, leaves a stain, or you are not satisfied with the results do not use.

**Use:** LEATHER PROTECTOR is easy to apply and results are remarkable. Shake the bottle well, then apply LEATHER PROTECTOR using the white cloth provided, taking care to cover the entire surface of the leather evenly. Protect areas that receive most wear very well.

The natural greases and acids in our skin are invisible, but when they come into contact with leather they may cause deterioration over time. This can be slowed down by regular cleaning and protection. Leave to air dry naturally after application. For a shinier finish, polish the leather when completely dry using a light coloured soft cloth.

**Attention:** Do not swallow. Keep away from children. Avoid contact with eyes. In case of contact flush with water. Wash hands after use.

# Recommendations for maintaining the natural beauty of your Natuzzi sofa:

- After purchasing your Natuzzi sofa, protect it with LEATHER PROTECTOR. Repeat the cleaning and protection process at least twice a year. High use furniture, like sofas and armchairs in front of televisions, should be treated every two months.
- Avoid placing sofas near fireplaces or radiators which can dry leather out.
- Avoid prolonged exposure to direct sunlight which fades all materials.
- Scars and wrinkles: these natural marks prove that the leather is natural and should not be considered defects.
- If you are unable to remove dirt and stains using the products contained in this kit, don't persist by rubbing too vigorously or using other products. To avoid irreparable damage to the sofa, we suggest you consult the retailer or contact the number [UK] +44 1235 444754 - [www.valsparuk.com](http://www.valsparuk.com) [AUS] +61 2 84845200 or send an email to [info@lillyindustries.com.au](mailto:info@lillyindustries.com.au).
